NOTE: Stocks that are finished with the Carbon Fiber exposed option can be 1 to 2 ounces lighter than the weights listed above.

*** Customize your stock:**

- 1) AG can add a 5" long, 1/4" thick aluminum insert into the forend of the stock. The end user or AG can drill and tap holes into this insert for additional swivel studs, bi-pod or picatinny rails.
- 2) AG can install an aluminum insert forward of the recoil lug to accommodate a tri-pod. This insert will be threaded for a 1/4 20 screw.
- 3) Stocks that have two slings swivels installed, the swivels are approximately 2.5" apart.
